Introductions

IT Educational tour has been a growing topic across the every IT related university and is a priority of the Mid-West University. Central Campus of Science and Technology BSC.CSIT 6th semester student committee has issued a request for proposal to help IT Educational Tour.

 The Proposal is a project to visit real working or developing IT field product, software developing Company, and highly Prestigious Technology running collage. The current 6th body consists of 22 students. Most of the students went to see the actual fieldwork of how software developers work on their projects. Delhi is the Best Destination for us because, in the modern 21st century, India is far ahead of us in terms of technology. India is one of the top 10 IT growing countries and Delhi is the IT hub of India.

Objectives

IT Educational Tours for BSC.CSIT students provide with an opportunity to collaborate with teachers, IT Companies, and Software development companies and integrate new perspectives with informal environments to enhance learning initiatives. Among the many educational tour benefits, skill development is the most important. In the IT field, most of the students went to see the actual fieldwork of how software developers work on their projects.

An educational tour offers students of all Classes an opportunity for a rich immersion experience. While an educational tour is great fun, it differs from a vacation. Typically led by a teacher and group chaperones, such trips provide invaluable global learning.

Plan of Action

The proposed plan is to visit 2 to 3 Software Development companies, 1 to 2 IT companies, and visit the IT Festival(IT महोत्सव).IT Festival is starting on June 6 in the capital city of India Delhi. In the end, on the way back we visit the world heritage listed Tajmahal and the very popular Indian visiting place Gowa. Your tour will be is in 5 to 8 day.

Cost Estimation

I hav^e not finished the estimated cost of the Delhi tour. The approximate cost of every student must have at least 10 to 15 thousand. The cost analysis will include the cost of traveling, sitting, and eating only.

Benefits and Conclusion

The 6th-semester students of BSC.CSIT will participate in a 7day trip to Delhi City, lead by the program head. Through this trip, the student can be observed and learn about the application of technology, real field software development companies, in the IT field how groups works together, and more.
education makes you a better person and teaches you various skills.
 A study tour helps students appreciate their field of study more and it really helps them better realize the interaction between their chosen fields of study to the rest of the world.
